

Texmaco Rail &
Engineering Limited,
Kolkata

Challenge

- Quickly respond to customer requirement for Casting
- To deliver the product with ISO quality and maximum yield and minimum defect

Why Adstefan ?

- Faster and reliable simulation system
- Analyze defects in casting
- Maximise yield
- Optimize the best way of gating
- Submission of the sample before deadline
- Reduce shop floor tryouts

Results

- Able to design best way of gating
- Reduce in shop floor tryout time by 40%.
- Able to cast complex casting
- Increase in yield of steel casting
- Very versatile software with result variations.

"Adstefan is a very user friendly and accurate and gives precise results. Interpretation is also easy and I have presented several technical papers by using this software. The simulation result almost matches with the real results."
