

Challenge

- Improve the yield of casting
- Quickly respond to customer requirement for Casting
- To Deliver the product with ISO quality and maximum yield and minimum defect.
- Having the technical base to tackle the foundry issue

Why Adstefan ?

- Fast and easy to use simulation system
- Helps in removing casting defects
- Helps in increasing the yield
- Optimises gating
- Helps in quick response to customers' requests
- Reduces methoding time
- Reduces shop floor tryouts

Results

- Able to design best way of gating
- Reduced shop floor tryout time by 40%.
- Able to cast complex casting
- Increase in yield of casting
- Having technical answer of every issue
- Increase in productivity

“We are highly satisfied with the performance of this software. Looking at the speed and results from the simulation I would rate this as the best software available”.
